

## SUMMER DRINKING WATER NETWORKS

In order to be more efficient in our summer operations, we have developed a procedure for the opening of the summer networks which will be held this year due to the exceptional temperature precisely May 1 to May 15 inclusively. **The openings will be carried out in an order of priority, determined by our aqueduct representatives.**

**It is important to understand that no individual request to open a summer network will be processed by phone or email during this period.**

The Municipality does not undertake to provide water, via the summer network, to any residence during this opening period. It is therefore preferable to wait until the week of May 17 to settle in for the summer holidays and thus ensure that your families have drinking water.

However, after the closing date for openings, that is, **from Monday, May 17, if residences have not obtained access to water from the summer network**, these residents will be invited to contact us at 819-324 -5670, ext. 3807.

We would appreciate it if you forward this message to any person or family for whom this information will be useful.
